

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CIFC Global Floating Rate Credit Fund (the "Fund") A sub-fund of CIFC Credit Funds ICAV (the "ICAV").

Class B-1 USD Accumulating Shares, ISIN: IE00BH3JFP20

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's investment objective is to generate attractive long-term risk adjusted returns through management of and investment in a portfolio of U.S, UK and European debt securities.

The Fund aims to achieve its investment objective by investing primarily in investment grade and non-investment grade rated debt tranches of collateralised loan obligations ('CLOs') which give access to U.S., U.K. and European senior secured corporate loans and bonds. The Fund is actively managed and is not managed in reference to a benchmark.

In respect of its investments in CLO securities, the Investment Manager will attempt to maintain a portfolio that is diversified across issuers, industry sectors and maturities, while seeking to invest in securities which it believes to be undervalued based on fundamental analysis of these securities to the prices of such securities.

The Fund will typically invest in mezzanine securities issued by CLOs which are primarily backed by a diversified portfolio of senior secured corporate loans and bonds and primarily securities which are rated "BBB", "BB" or higher by a Recognised Rating Agency and also to a limited extent, in securities which are rated "B". At least 50% of the Fund's Net Asset Value ('NAV') must be invested in cash and debt securities, with a long-term investment grade rating (higher than or equal to BBB-) by a Recognised Rating Agency. The Fund will invest in CLO securities in both the new issue and secondary markets.

The Fund may also invest in other types of debt securities of any duration, including both fixed and floating rate securities, issued by both corporate and governmental issuers which are listed or traded on Regulated Markets in the United States, Ireland, the Netherlands and other OECD member countries or may be unlisted. These debt securities may include but are not limited to commercial and residential mortgage-backed and other asset-backed securities,

For more information about the investment policy and strategy of the Fund, please refer to the sections entitled "Investment Objective and Policy" of the Fund's Supplement.

adjustable-rate securities, loan participations, credit-linked notes, collateralised bond obligations, municipal securities and inflation-indexed securities.

The Fund may from time to time invest up to 50% of its NAV in financial derivative instruments for investment purposes and these may include credit default swaps, total return swaps and options. The Fund may use repurchase and reverse repurchase agreements, currency futures and options and forward currency contracts for efficient portfolio management purposes and/or for currency hedging purposes.

In certain circumstances the Fund may hold cash deposits and/or cash equivalents (such as short term commercial paper, certificates of deposit, treasury bills, floating rate notes and fixed or variable rate commercial paper listed or traded on one or more Regulated Markets) or may invest up to 10% of its NAV in other UCITS funds such as eligible money market Funds.

The Fund's base currency is U.S. Dollar.

For Accumulating Shares, income will be automatically reinvested in the Fund and reflected in the NAV per share.

For Distributing Shares, if sufficient proceeds are available income will be paid in the form of a dividend, typically on a quarterly basis.

Investors can buy and sell shares of the Fund on each Wednesday or, if Wednesday is not a business day, the business day immediately following.

Business day means any day (except Saturday and Sunday) on which financial markets in the U.S. and Ireland are generally open for business or such other days as may be determined by the Directors.

The Fund may be appropriate for investors with a medium to long-term investment horizon.

Risk and Reward Profile

This indicator above is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment.

This Fund is in risk category 6 due to the range and frequency of price movements (i.e. the volatility) of the underlying investments referenced by the Fund which may not be a reliable indicator of the future risk profile of the share class.

The Fund offers no capital guarantee or protection.

The Fund may be subject to risks which are not included in the calculation of the risk-reward indicator. Key risk factors include:

Market Risk: The risk that the market will go down in value, with the possibility that such changes will be sharp and unpredictable.

Currency Risk: Some of the Fund's investments will be denominated in currencies other than the Fund's base currency (US Dollars) therefore investors may be affected by adverse movements of the denominated currency and the base currency. The Fund will attempt to use FDIs to hedge against currency movements, however there is no guarantee that any attempts at hedging will be successful.

Credit Risk: The Fund may be adversely affected if the issuer of a debt instrument fails to meet its repayment obligations. Corporate debt may be subject to credit rating downgrades which may result in the Fund experiencing losses. Sovereign debt is subject to the risk of the governmental entity being unable to meet principal and interest payments. By purchasing debt instruments, the Fund will assume this interest risk. Non-Investment grade investments have greater price volatility, loss of principal and interest, default and liquidity risks that higher rated securities.

Derivatives Risk: The Fund may invest in FDIs to hedge against risk and/or to increase return. There is no guarantee that the Fund's use of derivatives for either purpose will be successful. Derivatives are subject to counterparty risk (including potential loss of instruments) and are highly sensitive to underlying price movements, interest rates and market volatility and therefore come with a greater risk.

Operational Risk (including safekeeping of assets): The Fund and its assets may experience material losses as a result of technology/system failures, human error, policy breaches, and/or incorrect valuation of units. Social, political and economic developments and laws differ between regions. Changes in these may impact the Fund such as any changes that may occur due to the U.K's withdrawal from the EU (Brexit).

Liquidity Risk: The Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund.

Leverage Risk: The Fund implements a high use of leverage. Leverage presents opportunities for increasing both returns and losses because any event which affects the value of an investment is magnified to the extent leverage is employed.

Interest Rate Risk: Investment in leveraged loans and bonds through CLOs are sensitive to interest rate levels and volatility. Moving interest rates and economic conditions may lead to asset defaults and result in credit losses that may adversely affect the Fund's cash flow, fair value of its assets and operating results.

CLO Risk: The Fund invests in CLOs, which covers a wide range of securities, each of which is backed by a particular type of asset. The Fund may be susceptible to losses resulting from defaults within the CLO portfolios. Furthermore, the liquidity of the CLOs may be reduced in currencies other than the base currency and fluctuations in these exchange rates may affect the returns on investments.

For more information on risks, please see the section entitled "Special Considerations and Risk Factors" in the Prospectus of the ICAV.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:

Entry Charge	None
Exit Charge	None

This is the maximum amount that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year:

Ongoing Charges	0.78%
-----------------	-------

Charges taken from the Fund under certain specific conditions:

Performance Fee	None
-----------------	------

The Fund does not apply any entry or exit charges.

The ongoing charges figure shown here takes into account the voluntary expense cap of the Fund, whereby the investment manager has agreed to cap certain expenses as described in the Fund Supplement. The ongoing charges figure excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

The Fund may charge an anti-dilution levy of up to 5% for subscriptions or redemptions in order to cover dealing costs and to preserve the value of the underlying assets of the Fund.

Please refer to the "Fees and Expenses" section of the ICAV's Prospectus and the Fund Supplement for further detail on charges and fees for the relevant share classes.

Past Performance

The Fund was established in 2022.

Investors should note that the past performance chart reflects the past performance of the CIFC Global Floating Rate Credit Fund, a sub-fund of DMS UCITS Platform ICAV (the "Merged Fund") prior to its merger into the Fund on 22 June 2022. The performance data pre 22 June 2022 corresponds to the performance data of the Merged Fund which had a substantially similar investment objective and policies as the Fund. The performance data post 22 June 2022 corresponds to the performance data of the Fund.

Past performance is not a guarantee of future performance. In general, past performance takes into account all ongoing charges, but not any entry, exit or switching charge. Past performance shall be calculated in USD. **The value of your investment may go down as well as up and you may not get back the amount you originally invested.**

Practical Information

Depository Bank: J.P. Morgan SE - Dublin Branch
